

Fact Sheet N°10

Our history

1937 Three companies merge to form **Rayonier**, the single largest manufacturer of dissolving pulps in the world.

2014 Rayonier's performance fibers business becomes **Rayonier Advanced Materials**.

2017 Rayonier Advanced Materials acquires **Tembec**, marking a new chapter in the Rayonier story by forming a global forest products company.

Today Rayonier Advanced Materials has roughly **4,200 employees** across **20 facilities** in Canada, France and the US, with sales offices in China, Japan and the UK.

Rayonier Advanced Materials is a global leader, with an enduring commitment to research and development.

For the Kallima brand, product innovation starts with our modern paperboard machine and cutting-edge processes.

The paperboard mill that manufactures Kallima is known for its knowledgeable technical support and industry-leading customer service, as well as the quality and consistency of its products.

Thriving and poised for future growth, the company that makes Kallima leverages its 90 years of experience and innovation to meet the evolving needs of our industry – and our valued customers.
